SUBJ: FIRE PLAN FOR PROPOSED WHITESBORO TIRE SHREDDING FACILITY

Sir, attached you will find three location maps for the proposed tire shredding facility in Grayson County located at 19710 Hwy 377 Whitesboro TX 76273.

As noted before in our walk through we will be operating in an empty and currently unused part of the property known as G-Bar Fertilizer. There are no buildings or any other materials of import nearby. Adjacent to the shredding area is a bermed runoff pond measuring 150 meters by 50 meters and approximately 15 feet deep. When full it can be used for firefighting water, when empty can be used to capture runoff from firefighting efforts.

As for the fire plan we intend to have zero tires on the ground thereby reducing the fire hazard exponentially. However, as is already TCEQ facilities regulations there will be a fire extinguisher located near the shredded and another near the corner of the concrete pad denoted on the location maps by stars. As well, each piece of motorized equipment will contain one in accordance with TCEQ and DOT regulations.

As for daily water use we will be using a regular garden hose on low mist while the shredder is in operation. This is for blade cooling only. No other water will be used on a consistent basis. We expect no large pooling of water as most is usually evaporated due to the high heat.

If you have any questions or comments feel free to reach out to me.

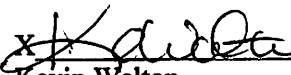

If you approve this plan feel free sign and return the bottom. If not please let me know what additional measures I will need to take to obtain approval.

Respectfully sent,

  
Tim Sommers  
TERC, LLC

---

I Kevin Walton Fire Marshal for Grayson County approve this fire plan <sup>kw</sup> and the formation of a ~~fire recycling facility~~ at the above address.
